JQueryCycle

Homepage: <http://www.malsup.com/jquery/cycle>

Author(s): M. Alsup

Version: 2.65

The jQuery Cycle Plugin is a lightweight slideshow plugin. Its implementation is based on the JQueryInnerFade Plugin by Torsten Baldes, the Slideshow Plugin by Matt Oakes, and the jqShuffle Plugin by Benjamin Sterling. It supports pause-on-hover, auto-stop, auto-fit, before/after callbacks, click triggers and many transition effects. It also supports, but does not require, the Metadata Plugin and the Easing Plugin.

Usage

Add the `jqCycle` class to the container holding the elements to be cycled.

Examples

St Andrews State Park

Located in the Florida panhandle

Endless fun.
