JQueryMaskedInput

Homepage: http://digitalbush.com/projects/masked-input-plugin
Author(s): Josh Bush
Version: 1.2.2

This is a masked input plugin for the jQuery javascript library. It allows a user to more easily enter fixed width input where you would like them to enter the data in a certain format (dates,phone numbers, etc). It has been tested on Internet Explorer 6/7, Firefox 1.5/2/3, Safari, Opera, and Chrome. A mask is defined by a format made up of mask literals and mask definitions. Any character not in the definitions list below is considered a mask literal. Mask literals will be automatically entered for the user as they type and will not be able to be removed by the user.

Usage

The following mask definitions are predefined:

- a - Represents an alpha character (A-Z,a-z)
- 9 - Represents a numeric character (0-9)
- * - Represents an alphanumeric character (A-Z,a-z,0-9)

JavaScript API

```
$("#date").mask("99/99/9999");
$("#phone").mask("(999) 999-9999");
$("#tin").mask("99-9999999");
$("#ssn").mask("999-99-9999");
```

Use a space instead of an underscore "_" character as a placeholder

```
$("#product").mask("99/99/9999",{
  placeholder:" "
});
```

Adda "completed" callback:

```
$("#product").mask("99/99/9999",{
  completed: function() {
    alert("You typed the following: "+this.val());
  }
});
```

Define an own mask:

```
$.mask.definitions['~']='[+-]';
$("#eyescript").mask("~9.99 ~9.99 999");
```

Foswiki integration

Use the **`jqMaskedInput`** class name to enable masked input on an input element. The mask itself is specified in the **`mask`** attribute.

Examples

Date:
Phone:
Product Key: Enter your product key of the form `a*-999-a999`. Submit
